jDroid-X-Desk - Volume 2: Remote Desktop & Daily Operations

This manual explains how a user operates jDroid-X-Desk after both computers already have the software installed. The procedures are written for first-time users.

1. Open the Application

1.1 Start jDroid-X-Desk

Objective: Complete this task successfully before moving to the next.

1. Press the Windows key.
2. Type 'jDroid-X-Desk'.
3. Select the application from the search results.
4. Wait until the dashboard opens.
5. Verify your Device ID and Online status are visible.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

1.2 Verify Readiness

Objective: Complete this task successfully before moving to the next.

1. Confirm Internet or LAN connectivity.
2. Verify no 'Offline' warning is displayed.
3. Ensure your firewall has not blocked the application.
4. Confirm the status indicator shows Ready.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

2. Connect to a Remote Computer

2.1 Obtain Remote Device ID

Objective: Complete this task successfully before moving to the next.

1. Ask the remote user to read or share their Device ID.
2. Confirm every digit before proceeding.
3. Do not guess missing characters.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

2.2 Initiate Connection

Objective: Complete this task successfully before moving to the next.

1. Click the 'Connect' field.
2. Enter the remote Device ID.

3. Select Connect.

4. Wait while the request is sent.

5. Do not close the application during negotiation.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

2.3 Host Approval

Objective: Complete this task successfully before moving to the next.

1. Ask the host to review the request.

2. Host verifies your name/device.

3. Host chooses the required permission profile.

4. Host clicks Allow.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

2.4 Verify Session

Objective: Complete this task successfully before moving to the next.

1. Wait for the remote desktop to appear.

2. Confirm the remote wallpaper is visible.

3. Move the mouse slightly.

4. Ask the host to confirm they can see the cursor move.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

3. Daily Remote Control

3.1 Mouse

Objective: Complete this task successfully before moving to the next.

1. Single-click to select items.

2. Double-click to open applications.

3. Right-click for context menus.

4. Use the wheel to scroll.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

3.2 Keyboard

Objective: Complete this task successfully before moving to the next.

1. Type normally.

2. Use shortcut keys when permitted.

3. Verify text appears on the remote computer.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

3.3 Clipboard

Objective: Complete this task successfully before moving to the next.

1. Copy text on one computer.
2. Paste on the other.
3. Verify formatting if rich text is used.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

3.4 File Transfer

Objective: Complete this task successfully before moving to the next.

1. Open File Transfer.
2. Browse local folders.
3. Select files.
4. Choose destination.
5. Monitor transfer progress.
6. Verify file integrity after completion.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

3.5 Multi-monitor

Objective: Complete this task successfully before moving to the next.

1. Open Display menu.
2. Choose Monitor 1 or 2.
3. Return to All Monitors if supported.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

4. Ending the Session

4.1 Save Work

Objective: Complete this task successfully before moving to the next.

1. Save any modified documents.
2. Close sensitive applications.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.

4.2 Disconnect

Objective: Complete this task successfully before moving to the next.

1. Click Disconnect.
2. Wait until the dashboard returns.
3. Verify session history contains the completed session.

Expected Result: Task completed successfully.

If it fails: Verify network connectivity, permissions, and retry.
